WHO WE ARE:

The City of La Habra employs two full-time Community Outreach Liaisons, providing daily team coverage to engage with individuals who are experiencing homelessness in La Habra. Assessments are made using a standardized assessment process as a road map to customize the needs of the individual and their unique circumstances and eventually match them with further supportive services conducted by various regional partners. The priority is to provide a consistent and transparent process for matching individuals and families to the most appropriate linkages to services and housing resources through the County's Coordinated Entry System. Referrals include a warm hand-off between access point providers and housing or supportive service providers. These supportive services and resources include shelter, mental health assistance, military veteran's support, transitional programs and substance abuse care. The La Habra Community Outreach & Engagement Team responds to community inquiries regarding areas of concern within the City.

If you are experiencing homelessness in La Habra, or know someone who is homeless, please email or call our team to discuss possible resources and supportive services that may be available.

Hillcrest Health & Wellness Center
